Form Letter B 127

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2/6/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

A company called FoxConn moved into my family city of Racine, WI. They promised the state jobs, growth, revenue, etc. They were permitted to take farms and homes that had been in families for generations. After leveling all of this property and creating a small development, they have failed to deliver on their promises. Rise Gold has a reputation for being this same kind of company and will not be any different.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Janet Acklam

B 127-1

anything good to Grass Valley!
If Rice Hall does mark this mine,
they will destroy the beauty and
tranquility of our community with
blasting of the mine tunnels and
hauling away the waste rock.
Further, the waste water dumped
into the South Fork Wolf Creek will
continue through the section of
Wolf Creek on our property. This section
of the creek was recently recovered
by the efforts of Newmont Mining. The
dumping of this mining water will
take us back many years to the
contaminants previously seen in our
Creek.

Please do not allow this project
to move forward!!

FORM LETTER B 127: JANET ACKLAM

Response to Comment B 127-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1, 2, and 3.

Regarding concerns about discharge into South Fork Wolf Creek, please see Master Response 35 - Discharge to South Fork Wolf Creek.

Janet Weaver

↑ Addendum: County Board of Supervisors:

I have several concerns regarding the Rise Gold Mine.

1. **Well Water:** Although we are 3.5 miles down Greenhorn, we may also be impacted by the voluminous amount of (possible contaminated) water that will be extracted from the mine. We are still in a drought and the snow disaster we had in December, reflects that. Trees had shallow roots because of the lack of water. The enormous amount of water that will be then sent down the South Fork Wolf Creek, perhaps overflowing its banks.
2. **Traffic:** As I left this morning at 8:45 a.m. to make my right onto Brunswick from Greenhorn I noted that there had to be a least 30 cars lined up at the flashing red light to enter the city or freeway. They were as far back as the exit from the mine on Brunswick. To add 100 trucks coming up from Bennett will probably put this line as far back as the "Y". Many people from outside of GV area, are probably unaware of the extra time it will take them each day to get either into our city or out of it.
3. **Toxicity:** Hard rock mining is extremely toxic. Our property was deemed an EPA Superfund in 1998 because of the tailing overflow from the 1997 storms. Because the County could not afford the clean-up, the federal agency stepped in and spent thousands of dollars to correct the toxic waste flowing down the Little Clipper Creek. Taxpayers from all over the country fund EPA. EPA continues to monitor this site and I understand it will always be deemed a Superfund site.

There are so many other reasons NOT to have this mine. Perhaps consider having it a permanent green waste space and build a cogeneration (cogen) plant, creating our own clean energy.

We are no longer a Mining Town and anything built in that area should reflect 2022 ideas and not 1849 ideas.

FORM LETTER B 131: JANET WEAVER

Response to Comment B 131-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1 and 3.

Regarding concerns about effects on nearby wells and drought, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, and Master Response 16 – Drought and Climate Change. Regarding effects to Wolf Creek, please see Master Response 35 - Discharge to South Fork Wolf Creek and Master Response 36 – Flows in South Fork Wolf Creek. Regarding concerns related to increased traffic on local roadways, please refer to Chapter 4.12, Transportation, of the DEIR. Regarding toxic waste, please see Master Response 8 - Mine Waste Characterization.

February 17, 2022

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter.

I have read both sides of the argument and I must say that my biggest concern is that Rise Gold is not trustworthy. They have lied and been manipulative. They have a history of suspect business practices. The positives for our community are few, if any. The list of possible negative impacts on our community is long, including changes in the character of our foothill community, and an increase in greenhouse gases adding to the problem of climate change instead of helping to solve it. We have suffered from damage from the mining industry before and are still living with the consequences. Rise Gold's history has shown that it does not care about the environment.

I am a Nevada County resident and see that the Rise Gold Corporation lacks concern for our environment and the people who live here. Despite what Rise Gold says or how it reports on its manipulated polls, this community does NOT support their project. Our community leaders will be taking an enormous risk if we approve this mine. Please do the right thing and advise the supervisors to deny permission to reopen.

BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

1. If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years near residential areas (undercutting property values).
2. The dewatering requirements while we endure a drought are reckless and a waste of this vital resource.
3. The value of gold as a store of value is volatile, antiquated and may lead to a sudden shutdown of mining operations with no accountability long term.

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Nevada City, CA, 95959

JAN 28 2022

Date: 1/22/2022

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,
I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

I want to protect our water and environment.
With California and our region burning every year it seems extremely irresponsible to reopen the mine.

B 142-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: Jesmine Reymond

Address: 551 N Pine St, Nevada City CA 95959

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE EFFECTS ON OUR WATER RESOURCES CANNOT BE PREDICTED. THERE ARE SO MANY CONNECTED MINE SHAFTS & ADITS THAT THERE IS BOUND TO BE WATER PUMPED OUT THAT IS NOT FIGURED INTO THE EFFECTS.
- BLASTING & TRUCKING NOISE WILL BE UNACCEPTABLE AND SCARE AWAY THE TOURISTS WE HAVE CULTIVATED.
- THE DRAFT EIR EFFECTS ARE UNDERESTIMATED & UNACCEPTABLE.
- RISE GOLD HAS A VERY POOR FINANCIAL REPUTATION. THEY WILL LEAVE US CLEANING UP FOR DECADES.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Judie L. Tartaglia

Name: JUDIE L. TARTAGLIA

B 158-1

FORM LETTER B 158: JUDIE TARTAGLIA

Response to Comment B 158-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1 and 3.

With regard to concerns related to water resources, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, Master Response 35 - Discharge to South Fork Wolf Creek, and Master Response 36 – Flows in South Fork Wolf Creek. Noise impacts related to the proposed project operations, including blasting and truck traffic, is addressed in Chapter 4.10, Noise and Vibration, of the DEIR.

Form Letter B 159

Date: MARCH 9, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE EFFECTS ON OUR WATER RESOURCES CANNOT BE PREDICTED DUE TO THE MINES CRACKS & FISSURES THAT ARE INTERCONNECTED.
- MOSSMAN HAS A VERY POOR FINANCIAL REPUTATION AND A VERY BAD ENVIRONMENTAL RECORD. WE'LL BE CLEANING UP HIS MESS FOR DECADES.
- EFFECTS ON THE ENVIRONMENT OF HUGE TAILINGS PILES IS WILDLY UNDERESTIMATED IN THE DEIS.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely, *Judiel Tartaglia*

23 2022 Date: February 21, 2022

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust, including asbestos, will drift downwind into Grass Valley.
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts of diesel exhaust will be produced from continuous operation, including the trucking in of explosives.
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential).
- Crushing of 1,500 tons of mine waste rock every day, all day, using massive machines that pollute!
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (see map).
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells.
- Waste water will be dumped into South Fork Wolf Creek, destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems.

B 160-1

- * Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- * The Rise Gold CEO already has numerous violations of mining and environmental laws.
- * Claims that a few hundred jobs cannot justify the likelihood of increased lung cancer in Nevada County.
- * Nevada County currently has a surplus of unfilled job positions.
- * Business that depends on tourism will be hurt.
- * Homeowners can lose an estimated 20% in their property values and more if the wells are dry.
- * A working mine will shatter the peace and quiet of many neighborhoods. *Noise affects mental health.*
- * Underground blasting is planned for 7 days a week and will be felt by those living above the 2,585 acres of mine underground mineral rights – see map!
- * While Rise Gold shareholders profit, the local community gets little revenue.
- * The relatively few theoretical jobs gained will not offset the harm done.
- * Where will the imported workers live when housing is so limited in our area?
- * An estimated 85% of vendor spending will not be local (explosives, chemicals, concrete, steel...).
- * Nevada County revenue will be from ordinary property taxes, not from gold.
- * The history and business practices of Rise Gold Corp. do not inspire trust.
- * Rise Gold Corp. has never opened a hard rock mine and has never made a profit on its business ventures.
- * Rise Gold CEO, Ben Mossman, has been charged with environmental violations in B.C. Canada.
- * There are many questions about the financial stability of Rise Gold Inc.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: Judy McVicker

Address: 17485 Brewer Rd.

FORM LETTER B 160: JUDY MCVICKER

Response to Comment B 160-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. Property values and quality of life concerns are outside the scope of CEQA – Please see Master Response 2. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

Regarding air pollution, including toxic air contaminants such as asbestos and diesel exhaust, as well as electricity consumption, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR. Regarding toxic waste, please see Master Response 8 - Mine Waste Characterization. With respect to concerns regarding effects on nearby wells, please see Master Response 14 - Adequacy of Groundwater Model and Master Response 15 - Adequacy of Groundwater Monitoring Wells. Regarding effects to Wolf Creek, please see Master Response 35 - Discharge to South Fork Wolf Creek and Master Response 36 – Flows in South Fork Wolf Creek. Vibration associated with blasting is addressed in Chapter 4.10, Noise and Vibration, of the DEIR. Finally, regarding concerns about underground blasting effects throughout the mineral rights area, please see Master Response 7.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

I am very concerned about water quality in our watershed. This mine's wastewater would be deposited into the South Fork of Wolf Creek. It's 2022, we have learned by now that waste into our precious waterways is extremely detrimental to our ecosystem and the creatures living within it. Also the health impacts to our beloved community - airborne toxic dust drifting into nearby communities/neighborhoods, and increased risk of cancers, increased danger due to increased truck hauling on Brunswick Rd.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Form Letter B 171

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA 95959

February 15, 2022

Dear Commissioners ~~Danny Milman, Laura Duncan, Robert Ingram, Mike Mastodonato and William Greeno~~

Cc Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock

I the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Ross Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find that Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors and businesses.

I have been to the gold mines in Elko Nevada and I have personally seen what is involved with a mining venture. It is totally disruptive to the area. To state some reasons:

- The mine will pollute our air and increase lung disease
- Clouds of airborne toxic mining dust, including asbestos, will drift downwind into Grass Valley
- if approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet. Even is kept "below legal noise level" it would still be heard all over the valley.
- Hard rock mining is the single largest source of toxic waste in the United States;
- Vast amounts of diesel exhaust will be produced from continuous operation, including the trucking in of explosives.
- A large factory on Brunswick Road is in the middle of hundreds of family homes and it is zoned "residential".
- Crushing of 1,500 tons of mine waste rock every day, all day, using massive machines.
- Trucks hauling 1,000 tons of mine waste rock, 100 trips every day, down Brunswick Road poling higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area.
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years de-watering hundreds of wells.
- Waste water will be dumped into South Fork Wolf Creek, destroying habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems.
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined.
- The Rise Gold CEO already has numerous violations of mining and environmental laws.
- Claims that a few hundred jobs cannot justify the likelihood of increased cancer in Nevada County. (The jobs made available to Nevada County residents would be for those of driving the waste rock trucks.)
- Nevada County currently has a surplus of unfilled job positions
- Business that depends on tourism will be hurt.
- Homeowners can lose an estimated 20% on their property values and more if the wells are dry.
- A working mine will shatter the peace and quiet of the Grass Valley area.
- Underground blasting is planned for 7 days a week and will be felt by those living above the 2,585 acres of mine underground rights.
- While Rise Gold shareholders profit, the local community gets little revenue.
- The relatively few theoretical jobs gained will not offset the harm done.
- Where will the imported workers live when housing is so limited in our area?
- An estimated 85% of vendor spending will not be local (explosives, chemicals, concrete, steel, . . .
- Neighbors of the mine not even open yet, have complained of sink holes on their property due to exploratory blasting, that will only get worse. As Nevada County is covered in old mine shafts that would collapse with the planned blasting.

I have personally witnessed a Gold Mining operation. I have seen the water filled with the cyanide and or arsenic, that was used to extricate the gold from the rock, flowing down to the holding ponds to be "removed"

B 171-1

and then have that water released into the creeks and rivers. I have seen the trucks used in a mining operation. I have witnessed the hills of rock from the mine deposited away from the mine.

I have seen the devastation caused by Gold Mines in production. The Nevada County will not longer be the destination for a peaceful, beautiful lifestyle. These are many reasons this mine should NOT be reopened.

If you have any doubt of the reasons stated, visit the Elko Nevada area's mines. Elko is not in a foothill forested area, full of residences all over the county, but you can see the impact a mine has on a desert area. Imagine what it would do to an area as Nevada County and our residences.

I am a resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley, in Nevada County. I truly hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Ms Kathryn Gerwig

RECEIVED

February 15, 2022

FEB 18 2022

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 170
Nevada City, CA 95959

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock, NEVADA COUNTY BOARD OF SUPERVISORS
Cc Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastodonato and William Greeno.

I the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Ross Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find that Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors and businesses.

I have been to the gold mines in Elko Nevada and I have personally seen what is involved with a mining venture. It is totally disruptive to the area. To state some reasons:

- The mine will pollute our air and increase lung disease
- Clouds of airborne toxic mining dust, including asbestos, will drift downwind into Grass Valley
- if approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet. Even is kept "below legal noise level" it would still be heard all over the valley.
- Hard rock mining is the single largest source of toxic waste in the United States;
- Vast amounts of diesel exhaust will be produced from continuous operation, including the trucking in of explosives.
- A large factory on Brunswick Road is in the middle of hundreds of family homes and it is zoned "residential".
- Crushing of 1,500 tons of mine waste rock every day, all day, using massive machines.
- Trucks hauling 1,000 tons of mine waste rock, 100 trips every day, down Brunswick Road poling higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area.
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years de-watering hundreds of wells.
- Waste water will be dumped into South Fork Wolf Creek, destroying habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems.
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined.
- The Rise Gold CEO already has numerous violations of mining and environmental laws.
- Claims that a few hundred jobs cannot justify the likelihood of increased cancer in Nevada County. (The jobs made available to Nevada County residents would be for those of driving the waste rock trucks.)
- Nevada County currently has a surplus of unfilled job positions
- Business that depends on tourism will be hurt.
- Homeowners can lose an estimated 20% on their property values and more if the wells are dry.
- A working mine will shatter the peace and quiet of the Grass Valley area.
- Underground blasting is planned for 7 days a week and will be felt by those living above the 2,585 acres of mine underground rights.
- While Rise Gold shareholders profit, the local community gets little revenue.
- The relatively few theoretical jobs gained will not offset the harm done.
- Where will the imported workers live when housing is so limited in our area?
- An estimated 85% of vendor spending will not be local (explosives, chemicals, concrete, steel, . . .
- Neighbors of the mine not even open yet, have complained of sink holes on their property due to exploratory blasting, that will only get worse. As Nevada County is covered in old mine shafts that would collapse with the planned blasting.

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Water supply in drought years

Water pollution

Dust pollution

We are still mitigating poison from past mining operations

Underground mining noise pollution

B 173-1

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

K Kemp

I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Rise gold has a horrid track record, still going to court for the toxic mess they left in British Columbia! Aside from polluting our creek (wolfe) with their waste water, greenhouse gas pollution, 80 year lease of truck traffic clogging our roadways, ruining many more wells than is stated, causing home prices to plummet, I can't believe our community, B.O.S, would even consider this! We will get no tax revenue, only a toxic mess!!!

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Why are we going backward instead of forward? The future of this community lies in residential growth from other areas and from tourism. Mining will not only eliminate that but also irrepably harm the lives of those of us already living here. We do not need more toxic water, and dust or heavy truck traffic or noise or toxic waste. We do not need to can't afford to lose what little water we have to mine operations. We will lose property value and the potential for other, higher paying, clean jobs. The Canadians or Chinese may get rich for awhile, but we will lose everything and have to start over, cleaning up another mess.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

JAN 26 2022
NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

*This is our water
I need it as well!*

B 183-1

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Name:

Kim B. Miller

Form Letter B 187

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2-16-2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

~~Pumping millions of cubic feet of ground water endangers all wells.~~ Especially in drought situations.
The mine will pollute our air and increase lung disease. Create toxic mining dust, including asbestos into our community
Cause serious issues to our health, environment, and property values.
Hard rock mining is the single largest source of toxic waste in the U.S. Trucking dangerous explosives.
The Brunswick location is in the middle of family homes zoned residential.
Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
The Rise CEO has history of violations of mining and environmental laws.
Number of possible jobs added, does not justify the potential damage noted above.
Tourism will be hurt, based on the potential damage noted above. If citizens' wells dry up, property value is gone.
The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- the impact on residential wells; the mine will be using millions of gallons of water & we are an area extremely affected by drought.
 - the impact on property values because of potentially dry wells, noise, diesel exhaust from trucks hauling waste rock; increased traffic on Brunswick, an already busy road.
 - the toxic waste generated by hard rock mining.
- * Please do not vote to reopen the mine!

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Form Letter B 196

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 3/21/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The potential negative health effects
- Waste water with toxins being dumped into Wolf Creek
- Pollution of our air & water
- Likely traffic & congestion associated with the mine operation

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Linda Ewald

Form Letter B 197

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 3/29/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

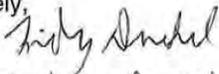

There are many reasons this mine should NOT be reopened. My personal reasons are:

- Concern about what de-watering the mine will do to the water table
- Concern about increased truck traffic
- Concern that hard rock mining is the single largest source of toxic waste in the US, and we are still dealing with the impacts of toxic waste from historical gold mining.

B 197-1

I am a member of the local faith-based organization, the Unitarian Universalist Community of the Mountains. Our values call us to use our human, spiritual and financial resources to make a difference in our local community and the world. Rise Gold has demonstrated disrespect for the environment and the people of Grass Valley, for example, their unrepresentative survey. Stopping Rise Gold would make a huge difference for all of us. I hope you will be among those who will be known to have stood against the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: Lindsay Danchel, Ph.D.

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

This company has already been fined in Canada for breaking environmental laws. The traffic generated by this proposal is prohibitive; with all of the building already going on in the basin, the roads are currently stressed as is, let alone with numerous big rigs. Additionally, the water treatment scenario is an unknown and many nearby residents stand to possibly lose their wells. The sound pollution will be atrocious. Although Rise Gold currently owns the land, the tax base would be better served by their selling the land to the city and employing many with the land used for a green waste reclamation site

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Lisa Harden

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- ① The mine will pollute our air and increase lung disease.
- ② A working mine will damage neighborhoods with shattered peace and quiet.
- ③ Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells.
- ④ Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for down stream ecosystem.
- ⑤ The history and Business practice of Rise Gold do not inspire trust.

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Form Letter B 208

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2/8/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses. Their untruthful "poll" of our sample citizenry, complete with prevarications of support for the mine, have been an affront, plastered on the back page of the Union.

There are many reasons this mine should NOT be reopened. My personal reasons are:

1. Concern for the wellbeing and safety of the thousands of residents surrounding the mine and waste sites.
2. Water contamination or dewatering of the wells of the surrounding properties.
3. Air pollution; toxic asbestos dust, diesel exhaust.
4. Underground tremors from blasting.
5. Noise of crushers running 24/7.
6. Previous and continuing violations of mining and environmental laws by Rise Gold.
7. Bankruptcy of Rise Gold.
8. Lowering of property values.
9. The disruption of our quiet, rural way of life, the very thing that brought us to this idyllic area from the noisy, contaminated, exceptionally crowded Los Angeles megalopolis.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

This is a bad company, out to extract money from our land at any price, regardless of the welfare of our citizens, our water, our state, our environment. Please vote NO.

Sincerely,

FORM LETTER B 208: LYNETTE SMITH-JAMES

Response to Comment B 208-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. Property values and quality of life concerns are outside the scope of CEQA – Please see Master Response 2. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

With respect to concerns regarding water contamination and effects on nearby wells, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, and Master Response 35 - Discharge to South Fork Wolf Creek. Regarding air pollution, including toxic air contaminants such as asbestos and diesel exhaust, as well as electricity consumption, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR. Vibration associated with blasting, as well as noise impacts related to the proposed project operations, is addressed in Chapter 4.10, Noise and Vibration, of the DEIR.

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses. Their untruthful "poll" of our sample citizenry, complete with prevarications of support for the mine, have been an affront, plastered on the back page of the Union.

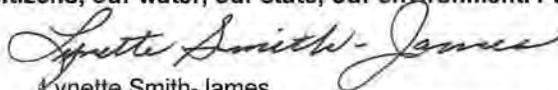

There are many reasons this mine should NOT be reopened. My personal reasons are:

1. Concern for the wellbeing and safety of the thousands of residents surrounding the mine and waste sites.
2. Water contamination or dewatering of the wells of the surrounding properties.
3. Air pollution; toxic asbestos dust, diesel exhaust.
4. Underground tremors from blasting.
5. Noise of crushers running 24/7.
6. Previous and continuing violations of mining and environmental laws by Rise Gold.
7. Bankruptcy of Rise Gold.
8. Lowering of property values.
9. The disruption of our quiet, rural way of life, the very thing that brought us to this idyllic area from the noisy, contaminated, exceptionally crowded Los Angeles megalopolis.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

This is a bad company, out to extract money from our land at any price, regardless of the welfare of our citizens, our water, our state, our environment. Please vote NO.

Sincerely,

Name: Lynette Smith-James

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- 1) It will negatively impact my rights to peaceful residential living by 24/7 sound pollution.
- 2) Traffic under current infrastructure will be negatively impacted and unable to support the mine operations
- 3) Water table for well water will be negatively impacted during a mega-drought!

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

MAR 14 2022 Date: February 22, 2022
NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

I do not trust them. Look at their history, which I believe you must have done yourselves. They pollute and leave a disaster. Let's find other industries to boost our economy. We've already driven out prior businesses, and we've done little to entice anyone to replace them.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 212-1

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)

- Crushing of 1,500 tons of mine waste every day, all day, using massive machines
- X · Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- X · Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells
- Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems *→ from the last mining operations.*
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- Numerous Rise Gold violations of mining and environmental laws in Canada and here – already
- Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)
- Business life that depends on tourism will be hurt
- Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)
- A working mine will damage neighborhoods with shattered peace and quiet
- Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!
- While Rise Gold shareholders (largely Canadian) profit, the local community gets little.
- The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.
- Where will the imported workers live when housing is already so limited in our area? *?*
- 85% of vendor spending will not be local *?*

· Nevada County revenue will be only from property taxes, all other taxes will go to the state

X The history and business practices of Rise Gold do not inspire trust

· Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date

X · Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts

· There are many questions as to the financial stability of this company.

· The potential “breakout” from the mine’s contaminated settling pond during one of our “atmospheric river” storms is enormous.

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Madeline Dowd

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

Our highways are already impacted by additional trucks and construction. Rise's history is one that we can learn from. Why invite that unethical business into our community? There are better options, as long as we make our county business friendly.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- ~~X~~ Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)
- Crushing of 1,500 tons of mine waste every day, all day, using massive machines

There are many reasons this mine should NOT be reopened. My personal reasons are:

- WITH CALIFORNIA IN A STATE OF DROUGHT & WATER RESOURCES LIMITED, WHERE WILL WATER ~~FROM~~ THE MINE COME FROM WITHOUT IMPACTING THE ^{NEEDED FOR} EXISTING ENVIRONMENT & RESIDENTS OF OUR COMMUNITY?
- THE C.E.O. OF RISE GOLD HAS BEEN CHARGED WITH ENVIRONMENTAL VIOLATIONS IN CANADA. WHAT'S TO STOP HIM FROM DOING THE SAME HERE?
- OUR COMMUNITY IS NO LONGER A GOLD MINING COMMUNITY. LOCAL RESIDENTS AREN'T ~~THE~~ EXPERIENCED IN MINING JOBS & THE MINE WILL DISRUPT IT WITH NOISE, TRAFFIC, & TOXIC WASTE.

I am a resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: MARK REILLY

Address: 118 CONSWAY AVENUE, GRASS VALLEY, CA 95945

Date: 2/10/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- WATER IS A LIMITED RESOURCE IN DROUGHT RIDDEN CALIFORNIA. RISE WILL BE TAKING WATER AWAY FROM OUR EXISTING RESIDENTS & NATURAL LANDSCAPE IN ORDER TO MINE ^{& PROFIT FROM} TRILING GOLD.
- THE CEO OF RISE GOLD WAS CHARGED WITH ENVIRONMENTAL VIOLATIONS IN CANADA. WHAT'S TO STOP HIM FROM DOING IT HERE?
- OUR RESIDENTS & COMMUNITY HAVE MOVED ON FROM BEING A GOLD RUSH TOWN. ^{SKILLS} WORKERS WILL HAVE TO COME FROM OUTSIDE THE COMMUNITY. THE MINE WILL CAUSE TRAFFIC, NOISE, & TOXIC POLLUTION.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed. ^{GO TO INVESTORS} PROFITS WILL NOT GRASS VALLEY.

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

...Air pollution. I recently read a presentation by Pam Heard, a respiratory therapist, given on December 16, 2021. It was a detailed listing of toxic air pollutants that would be released into the Nevada County air with operation of the proposed mine. They included diesel exhaust, radon, silica and asbestos. I moved to Nevada County with my daughter, son-in-law and grandchildren, looking forward to all the assets of a healthy, less urban environment. The Rise Gold mine would certainly dash our hopes for a beautiful safe environment.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Hitler was a major reason Volkswagen got off the ground.

If the Germans looked at revitalizing things over there, they might want to focus on what works but not sentimentalize what hasn't. In other words, just because something is historic is not a reason for it to exist today.

Mining causes environmental damage. Right now, there's so much gold above ground they store giant bars of it in vaults. We don't need to "generate wealth" by pulling more gold out of the ground at the cost of environmental damage, proven risk to groundwater, ~~and~~ noise, and other palpable ills. Lets focus on ^{wealth in} ~~wealth~~ _{that helps people}

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Form Letter B 239

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

January 17, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, Mike Stolla, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

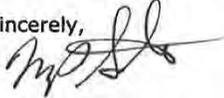

- Mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust, including asbestos, will drift downwind into Grass Valley.
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts of diesel exhaust will be produced from continuous operation, including the trucking in of explosives.
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential).
- Crushing of 1,500 tons of mine waste rock every day, all day, using massive machines.
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (see map).
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells.
- Waste water will be dumped into South Fork Wolf Creek, destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems.
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- The Rise Gold CEO already has numerous violations of mining and environmental laws.
- Claims that a few hundred jobs cannot justify the likelihood of increased lung cancer in Nevada County.
- Nevada County currently has a surplus of unfilled job positions.
- Business that depends on tourism will be hurt.
- Homeowners can lose an estimated 20% in their property values and more if the wells are dry.
- A working mine will shatter the peace and quiet of many neighborhoods.
- Underground blasting is planned for 7 days a week and will be felt by those living above the 2,585 acres of mine underground mineral rights -- see map!
- While Rise Gold shareholders profit, the local community gets little revenue.
- The relatively few theoretical jobs gained will not offset the harm done.
- Where will the imported workers live when housing is so limited in our area?
- An estimated 85% of vendor spending will not be local (explosives, chemicals, concrete, steel...).
- Nevada County revenue will be from ordinary property taxes, not from gold.

B 239-1

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

Sincerely,

Michael P. Stolla

MAR 21 2022 Date: February 22, 2022
NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

I do not trust them. Look at their history, which I believe you must have done yourselves. They pollute and leave a disaster. Let's find other industries to boost our economy. We've already driven out prior businesses, and we've done little to entice anyone to replace them.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)

B 245-1

- Crushing of 1,500 tons of mine waste every day, all day, using massive machines
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells
- Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- Numerous Rise Gold violations of mining and environmental laws in Canada and here – already
- Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)
- Business life that depends on tourism will be hurt
- Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)
- A working mine will damage neighborhoods with shattered peace and quiet
- Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!
- While Rise Gold shareholders (largely Canadian) profit, the local community gets little.
- The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.
- Where will the imported workers live when housing is already so limited in our area?
- 85% of vendor spending will not be local

- Nevada County revenue will be only from property taxes, all other taxes will go to the state
- The history and business practices of Rise Gold do not inspire trust
- Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date
- Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts
- There are many questions as to the financial stability of this company.
- The potential “breakout” from the mine’s contaminated settling pond during one of our “atmospheric river” storms is enormous.

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Regarding air pollution, including toxic air contaminants such as asbestos and diesel exhaust, as well as electricity consumption, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR. Regarding toxic waste, please see Master Response 8 - Mine Waste Characterization. With respect to concerns regarding effects on nearby wells, please see Master Response 14 - Adequacy of Groundwater Model and Master Response 15 - Adequacy of Groundwater Monitoring Wells. Regarding effects to Wolf Creek, please see Master Response 35 - Discharge to South Fork Wolf Creek and Master Response 36 – Flows in South Fork Wolf Creek. Vibration associated with blasting is addressed in Chapter 4.10, Noise and Vibration, of the DEIR. Finally, regarding concerns about underground blasting effects throughout the mineral rights area, please see Master Response 7.

Form Letter B 246

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: February 22, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

Can we truly trust them? No. Look at their history.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)
- Crushing of 1,500 tons of mine waste every day, all day, using massive machines
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells

B 246-1

- Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- Numerous Rise Gold violations of mining and environmental laws in Canada and here – already
- Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)
- Business life that depends on tourism will be hurt
- Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)
- A working mine will damage neighborhoods with shattered peace and quiet
- Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!
- While Rise Gold shareholders (largely Canadian) profit, the local community gets little.
- The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.
- Where will the imported workers live when housing is already so limited in our area?
- 85% of vendor spending will not be local
- Nevada County revenue will be only from property taxes, all other taxes will go to the state
- The history and business practices of Rise Gold do not inspire trust
- Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date
- Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts
- There are many questions as to the financial stability of this company.

· The potential “breakout” from the mine’s contaminated settling pond during one of our “atmospheric river” storms is enormous.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I’m confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock:

I am a tax-paying resident of Nevada County. I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and local businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- Negative Impact on local water supply
- Negative Impact on local air quality
- Negative impact on my property value in Grass Valley
- Negative impact on local roads from increased truck traffic
- Negative impact on quality of life in Grass Valley
- Not a good use of County or public resources

I believe that Rise Gold Corporation lacks the resources and will to mitigate the impact of their mine project on the environment and the people of Grass Valley. I hope you will join me and thousands of other local residents who are opposed to the Rise Gold Mine proposal.

Sincerely,

Nancy Jacobsen

The Truth about the Rise Gold Mine

The Nevada County Board of Supervisors can vote to stop reopening the Idaho-Maryland Gold Mine by Rise Gold Corp. a Canadian Corp. also incorporated in Nevada.

Approval of Rise Gold Corporation's proposal will result in:

- **A large, heavy-industry factory** on 119 acres on Brunswick Rd. in the middle of hundreds of homes (zoned residential)
- **Crushing and moving 1,500 tons of mine waste every day, all day**, using massive machines
- **Hauling trucks carrying 1,000 tons of waste rock --over 100 round trips every day --** down Brunswick Rd. to a 56-acre location (Centennial toxic dump) less than ½ mile from downtown Grass Valley, piling it higher than a 6-story building
- **Trucks and heavy machinery will produce diesel exhaust from continuous operation**
- **Clouds of mining dust including asbestos** can move over Grass Valley from digging and dumping 1,500 tons of contaminated landfill a day
- **Blasting, earth-shaking explosions** 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (including the Hospital) that can be felt inside homes
- **Over 3.5 million gallons per day to start and then 1.2 million gallons per day of waste mine water** pumped into Wolf Creek then to Bear River for the next "80 years"
- **12% of Nevada County's electricity will be taken by the Mine, more than all the County businesses combined**

What impacts are predicted if the Mine is approved?

Air pollution will worsen respiratory problems in Grass Valley and probably increase the death rate in Western Nevada County (expert conclusion), especially among the most vulnerable such as the elderly (over 7 hospital & senior care facilities are near the Centennial dump site). (<https://www.minewatchnc.org/post/dr-newsom-on-health-risks-of-mine>)

The South Fork of Wolf Creek will likely have stirred up mercury, toxic chemical residues (like cyanide & lead), and serious erosion.

Real-estate value in the vicinity will drop more than 20% (Realtors' estimate in the Union).

Loss or damage to hundreds of homeowners' wells likely from mine dewatering.

Few local jobs and little tax revenue. See Martin Webb at Minewatchnc.org and *Rise Gold Project Description* p.26 (mynevadacounty.com)

Inadequate regulation because there are not enough government personnel. Based on history, the fixes for damages will not be enforced (<https://www.minewatchnc.org/post/no-state-monitor-for-mine>). Legal charges against Rise Mine Corp. in Canada for failure to clean up their toxic sites are pending in court.

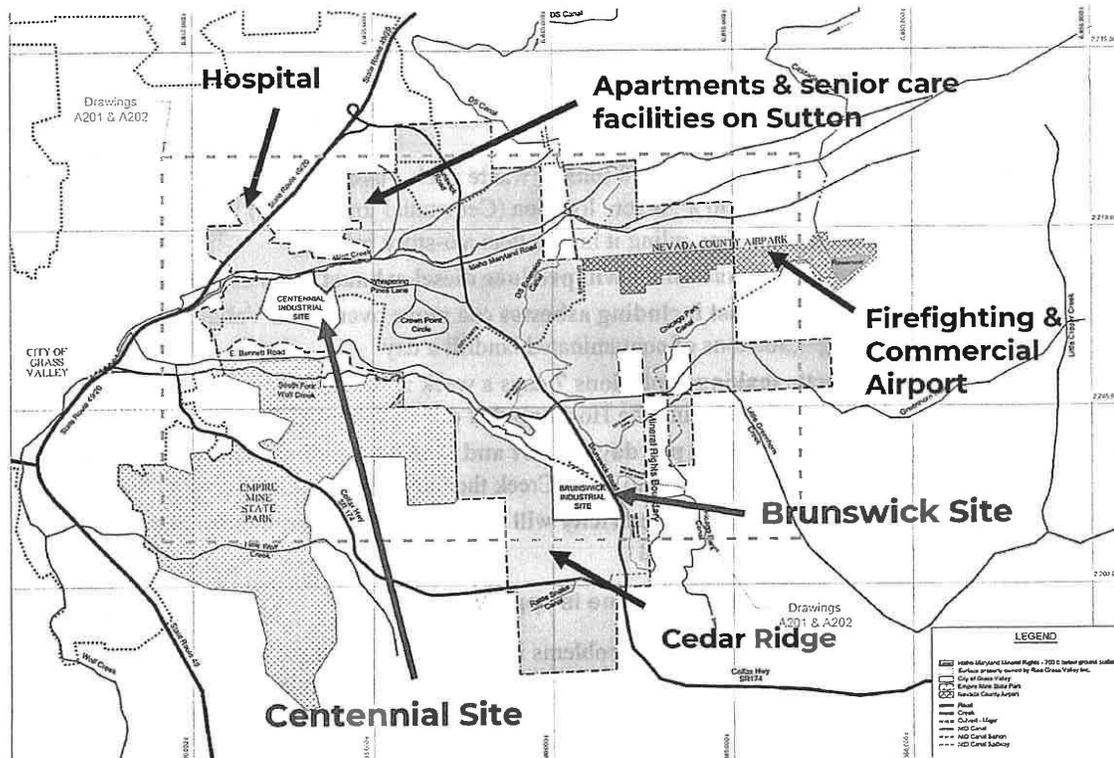

The Truth about the Rise Gold Mine

Dozens of residents contributed to this including the *Elders Action Network*.

Over 3000 citizens have filled in the petition at www.MineWatchnc.org

Rise Mine plans map: (Brunswick Site=115 acre industrial center, Centennial=toxic waste dump)

* Grey area is where they can tunnel and blast (mining rights)

Form Letter B 258

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2/5/2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- environmental degradation
- the ugliness of mining including waste rock, big Trucks thundering along destroying roads and the peace & quiet and putting Tourism off.
- Threats to our health from Toxic mining dust
- waste water affecting Wolf Creek ecosystems

and if that wasn't enough it's been documented that Rise Gold CEO is not to be trusted, he promises lots but his record shows numerous violations of laws, both environmental and mining. The company is suspect.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- It is a Tourism Killer (people & businesses)
- a severe health threat (diesel exhaust, mining dust that's toxic, noise pollution that can negatively affect mental health - the list goes on.)
- water issues of great magnitude (millions of gallons of contaminated water removed every day - waste water damaging creek ecosystems)
- will sink holes appear? - will some buildings be damaged by massive machines, heavy trucks night + day, explosives? And this for estimated decades.
- with the history Rise Gold Corp has painted, how can they be trusted? Violations of environmental laws - not being a profitable business. What's good about Rise Gold?

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

NEVADA COUNTY
BOARD OF SUPERVISORS

Date: Jan 30, 2022

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

SINCE THE CLOSING OF THE LAST MINE MANY YEARS AGO, THE ENVIRONMENTAL IMPACT OF MINING HAS BEEN CLEARLY ESTABLISHED. MY CONCERNS ARE 1) AIRBORNE TOXINS FROM WASTE ROCK & CONTAMINATED WATER 2) NOISE AND AIR POLLUTION FROM TRUCKS COMING & GOING ALL DAY 3) IMPACT PROPERTY SALES THROUGHOUT THE AREA.

AND FOR WHAT? 200 JOBS? There is NO GUARANTEE

THAT THEY WOULD BE WELL PAYING OR GO TO LOCAL RESIDENTS. WHEN THE CANADIAN CO. WAS GOING TO REOPEN THEY PLANNED ON BEING CANADIAN RESIDENTS FOR THE JOBS. PLEASE VOTE AGAINST THIS PROPOSAL.

I am a resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

there are currently 3 new large housing developments being constructed in Grass Valley of over 300 new homes adding close to twice that many new cars, adding to the already difficult traffic situation in town. If this mine project expects to bring 300 new jobs for people from out of town then that will bring in hundreds of more vehicles. This doesn't account for the drastic increase in trucking the waste rock through the basin. And also this company is not TRUSTWORTHY

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

There is Risk to our health, our environment, our property value and our peace and quiet.
Hard Rock mining is the single largest source of toxic waste in the United States.
We must protect our water and ecosystems.

I am a member of the local faith-based organization, the Unitarian Universalist Community of the Mountains. Our values call us to use our human, spiritual and financial resources to make a difference in our local community and the world. Rise Gold has demonstrated disrespect for the environment and the people of Grass Valley, for example, their unrepresentative survey. Stopping Rise Gold would make a huge difference for all of us. I hope you will be among those who will be known to have stood against the well-funded deception Rise Gold Mine has developed.

Form Letter B 267

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 4/4/2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)
- Crushing of 1,500 tons of mine waste every day, all day, using massive machines
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells
- Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- Numerous Rise Gold violations of mining and environmental laws in Canada and here – already
- Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)
- Business life that depends on tourism will be hurt

B 267-1

- Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)
- A working mine will damage neighborhoods with shattered peace and quiet
- Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!
- While Rise Gold shareholders (largely Canadian) profit, the local community gets little.
- The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.
- Where will the imported workers live when housing is already so limited in our area?
- 85% of vendor spending will not be local
- Nevada County revenue will be only from property taxes, all other taxes will go to the state
- The history and business practices of Rise Gold do not inspire trust
- Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date
- Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts
- There are many questions as to the financial stability of this company.
- The potential "breakout" from the mine's contaminated settling pond during one of our "atmospheric river" storms is enormous.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Date:

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

The water table will be sucked dry, Peoples wells will be drained. As the water table is polluted and drained the trees will die. This mine cares zero about the environment and the people. It will ruin the quality of life and decimate the environment, Pollution, Noise, Fire hazard. The housing market will drop. Obviously those who vote for the mine are taking bribes to push this through. Use your critical thinking -

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- Over 80% of gold is mined for wealth ~~accumulation~~
- Do we really need to increase our energy use by 25%
- Do you want your kids to work underground in a mine? And they won't be making \$93,000
That's an average salary. Out of town Executives will make the \$\$\$\$

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

*Pollution of air, water & the general environment,
Distrust of this company and belief that this
Project is not right for this place and time.
There's already more than sufficient residual
damage from industrial scale mining in this
County. I recommend re-zoning of the site to
prevent future re-opening applications.*

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

BOARD OF SUPERVISORS

B 277-1

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

As a homeowner, according to a study by local realtors, my property can lose an estimated 20% in property values if the mine is opened due to the effects on the environment; air pollution and cancer risk due to toxic particles being released into the air, water pollution, traffic in Grass Valley, and excess noise. This will deter people from moving here for retirement.

I live close to Hwy 49 in Berriman Ranch and would have to put up with the noise of a constant convoy of trucks hauling loads for processing out of town down Hwy 49 night and day.

Nearby Wolf Creek that my family recreates at, would be flooded with mine waste water and stir up toxic residues that will harm the environment.

Businesses and the local economy that depend on tourism will be hurt when our bucolic Sierra Foothill community is reduced to an industrial site.

If approved, the mine will operate 24 hours a day, 7 days a week, for up to 80 years. There is serious risk to our health, our environment, our property values, and our peace and quiet.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Rise Gold has a history of destructive environmental disasters that they have failed to clean up. Even if Rise is able to break their habitual chain of environmental destruction, business as anticipated will be destructive and disruptive. Hard rock mining releases substantial levels of toxic materials into the air and water including asbestos, mercury, cyanide and lead. Waste water will be dumped into our rivers and asbestos into our air. Rise will operate 24/7, heavily laden trucks will pollute our town and ruin our roads. Please Reject Rise Gold.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

I strongly oppose the mine. Given the climate issues and the stress on the planet, I believe there is no way to predict the effect of the mine, the underground tunnels and continuous digging will have on our community and its inhabitants.

I am a member of the local faith-based organization, the Unitarian Universalist Community of the Mountains. Our mission calls us "to use our human, spiritual and financial resources to make a difference in our local community and the world." Rise Gold has demonstrated disrespect for the environment and the people of Grass Valley, for example, their unrepresentative survey. Stopping Rise Gold would make a huge difference for all of us. I hope you will be among those who will be known to have stood against the well-funded deception Rise Gold Mine has developed.

The Truth about the Rise Gold Mine

The Nevada County Board of Supervisors can vote to stop reopening the Idaho-Maryland Gold Mine by Rise Gold Corp. a Canadian Corp. also incorporated in Nevada.

Approval of Rise Gold Corporation's proposal will result in:

- A large, heavy-industry factory on 119 acres on Brunswick Rd. in the middle of hundreds of homes (zoned residential)
- **Crushing and moving 1,500 tons of mine waste every day, all day**, using massive machines
- **Hauling trucks carrying 1,000 tons of waste rock --over 100 round trips every day --** down Brunswick Rd. to a 56-acre location (Centennial toxic dump) less than ½ mile from downtown Grass Valley, piling it higher than a 6-story building
- **Trucks and heavy machinery will produce diesel exhaust from continuous operation**
- **Clouds of mining dust including asbestos** can move over Grass Valley from digging and dumping 1,500 tons of contaminated landfill a day
- **Blasting, earth-shaking explosions** 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (including the Hospital) that can be felt inside homes
- **Over 3.5 million gallons per day to start and then 1.2 million gallons per day** of waste mine water pumped into Wolf Creek then to Bear River for the next "80 years"
- **12% of Nevada County's electricity will be taken by the Mine, more than all the County businesses combined**

What impacts are predicted if the Mine is approved?

Air pollution will worsen respiratory problems in Grass Valley and probably increase the death rate in Western Nevada County (expert conclusion), especially among the most vulnerable such as the elderly (over 7 hospital & senior care facilities are near the Centennial dump site). (<https://www.minewatchnc.org/post/dr-newsom-on-health-risks-of-mine>)

The South Fork of Wolf Creek will likely have stirred up mercury, toxic chemical residues (like cyanide & lead), and serious erosion.

Real-estate value in the vicinity will drop more than 20% (Realtors' estimate in the Union).

Loss or damage to hundreds of homeowners' wells likely from mine dewatering.

Few local jobs and little tax revenue. See Martin Webb at Minewatchnc.org and *Rise Gold Project Description* p.26 (mynevadacounty.com)

Inadequate regulation because there are not enough government personnel. Based on history, the fixes for damages will not be enforced (<https://www.minewatchnc.org/post/no-state-monitor-for-mine>). Legal charges against Rise Mine Corp. in Canada for failure to clean up their toxic sites are pending in court.

FORM LETTER B 284: SANDRA BURKE

Response to Comment B 284-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1 and 3.

Regarding concerns about water supply, water quality, and drought, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, Master Response 16 – Drought and Climate Change, and Master Response 35 – Discharge to South Fork Wolf Creek. Regarding concerns related to increased traffic on local roadways, please refer to Chapter 4.12, Transportation, of the DEIR. Regarding concerns about air pollution, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR.

Form Letter B 285

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: February 25, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading, and manipulative. Their untruthful "poll" of our sample citizenry, complete with prevarications of support for the mine, have been an affront, plastered on the back page of the Union. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

The mine will pollute our air due to toxic mining dust, including asbestos, which will increase lung disease. There will be massive amounts of diesel exhaust produced from the continuous movement of trucks hauling waste rock making over 100 trips per day. There is also the possibility of dewatering wells for residences near the site.

Rise Gold CEO, Ben Mossman has been charged with an environmental disaster in British Columbia, Canada. He was involved in a corporation called Banks Island Gold, Ltd. The mine had so many non-compliance and safety issues that it was ordered closed by the British Columbia government. It went into bankruptcy and the province has a huge environmental waste site to clean up at taxpayers expense. Besides this there are numerous questions about the financial stability of this company.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

Sincerely,

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE EFFECTS ON OUR WATER RESOURCES ARE SERIOUSLY UNDERESTIMATED. THE IMPACT ON WELLS & AQUIFERS IS DIFFICULT TO ESTIMATE DUE TO MINES, FISSURES & CRACKS UNDER THE COUNTY.
- TOURISTS & RESIDENTS WILL LEAVE THE COUNTY DUE TO NOISE, DRY WELLS & TRAFFIC.
- MOSMAN IS A BAD FINANCIAL RISK. HE'LL LEAVE THE COUNTY WITH AN ENVIRONMENTAL DISASTER WHICH WILL TAKE DECADES TO REMEDIATE.
- 300 SUPPOSED JOBS IS NOT WORTH THE DISASTER THE MINE WILL CAUSE.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Sandy Pack

FORM LETTER B 296: SHEILA BAKER

Response to Comment B 296-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

Form Letter B 297

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2/2/22

Dear Commissioners **Danny Milman**, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

We, Nevada County, are so far beyond going backwards to an active mining county!! Look at the population, water tables, pollution on so many levels, JOBS - that is a joke - we cannot fill the ones we currently have. **Question**, who is getting paid off to approve this scheme?? They have a very poor track record!!
NO, NO, NO

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

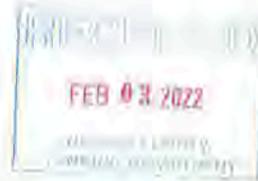

Name: Sheila Baker

Form Letter B 298

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2-16-2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Pumping millions of cubic feet of ground water danger all residential wells, especially during current drought situation.

The mine will pollute our air and increase lung disease. Create toxic mining dust, including asbestos into our community
Cause serious issues to our health, environment, and property values.
Hard rock mining is the single largest source of toxic waste in the U.S. Trucking dangerous explosives.
The Brunswick location is in the middle of family homes zoned residential.
Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
The Rise CEO has history of violations of mining and environmental laws.
Number of possible jobs added, does not justify the potential damage noted above.
Tourism will be hurt, based on the potential damage noted above. If citizens' wells dry up, property value is gone.
The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Because I live near the mine site, off Brunswick
by the "Y" - at hwy, 174

- 1- traffic with trucks hauling waste rock down Brunswick Road - also diesel exhaust
- 2- blasting in tunnels under my home - noise pollution
- 3- fear of contaminating my well-
- 4- general pollution of our air

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

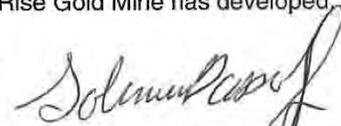

There are many reasons this mine should NOT be reopened. My personal reasons are:

The main mine access and processing facilities will be located at the 119-acre New Brunswick site located at the corner of Brunswick and East Bennett Roads. Operations will also utilize the 56-acre Centennial site on Idaho-Maryland Road west of Centennial Drive to dispose of mine-waste.

Mining will take place 24 hours a day, 7 days a week. About 1500 tons of waste rock and tailings will be removed from the mine daily. Of this, 500 tons per day will be mixed with cement to form a paste backfill and re-deposited into the mine. The remaining 1000 tons per day will be deposited at the Centennial site and at a 31-acre area along Brunswick Road just south of the processing facility and bounded by neighborhoods on Cedar Ridge Drive, Elk Lane, and Mink Court.

Waste rock and tailings from the mine will be **transported by trucks making up to 100 round trips per day, 16 hours per day, 7 days per week.** To get to the Centennial site, they will turn left onto Brunswick Road about 0.4 miles south of East Bennett Rd, pass through the intersection of East Bennett and Brunswick and turn left onto Whispering Pines Lane to reach Centennial Drive.

At the Centennial site, an area of **44 acres will be built up with "engineered fill" to depths of up to 70 feet**, eventually forming a 37-acre graded surface that may be utilized for future development. Similarly, the mine waste dumped at the Brunswick Road site will eventually cover an area of **31 acres and be built up as much as 90 feet** to form a 21-acre graded area for possible future industrial uses.

The trucks will be loaded with rock with a front-end loader. **Hauling will take place 6:00 AM – 10:00 PM, 7 days a week.** After the rock is dumped, it will be **graded and compacted 7:00 AM – 3:30 PM, 7 days a week, using bulldozers, graders, and rolling**

B 310-1

compactors. This activity will take place continuously for 11 years or until both build-up areas are maximized. After that, mine waste materials will have to be hauled out via Brunswick Road to Glenbrook Basin in order to access Hwy 49 for transport to sites not yet identified.

In terms of energy use, the permit application estimates a PG&E power net load of 6000 Kilowatts (KW). Planned diesel backup power generation capacity is 6000 KW. Electricity utilization is estimated at 42,757,000 Kilowatt-Hours (KWH) per year. This is equivalent to the electric use of about 5000 houses.

Full operations of the mine, including fuel for equipment, electricity, and other operational uses are estimated to produce around 9,000 metric tons of greenhouse gas emissions per year.

Cement, explosives, diesel, and various other chemicals will be regularly transported to the site and stored. Cement will be mixed with tailings and pumped back underground and used to backfill mining voids. By one estimate, the backfill paste will use approximately 25 tons of cement daily. Explosives will include ANFO (Ammonium Nitrate and Fuel Oil), and Ammonium Nitrate Emulsion. Up to 28,000 lbs. of explosives will be stored onsite underground. Diesel fuel storage will consist of a 30,000-gallon aboveground storage tank. A number of other chemicals will be utilized for processing the gold using the sulfide flotation system and other activities.

Industrial buildings covering 122,000 square feet are proposed for the New Brunswick site. Noteworthy among these would be the gold processing plant with dimensions of 425 feet by 70 feet and 65 feet high, and the shaft headframe building with a height of 165 feet. Running between these buildings will be a 365' long enclosed conveyor system. Tailings will be stockpiled onsite while waiting for transport.

The application to re-operate the Idaho-Maryland mine states that 312 jobs would be created by the mine operations. Of those jobs, 242 jobs are specialized technical positions likely taken by people recruited from outside the area. The remaining jobs, truck transport of mine waste, and mineral processing, could provide 70 jobs for current local residents.

I want no part of any of this in my community. PERIOD!

I live on the land at Nevada County and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Susan Joanne

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

So many, but mainly pollution: air, water, noise. Negative impacts on traffic and quality of life.

In short: It's time to put the health of the planet and communities over profit.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Susan Sanford

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Use of over 12% of Nevada Co's electricity, more than all
The County's businesses combined,
The Rise Gold CEO already has numerous violations of
mining and environmental laws,
Businesses that depend on Tourism will be hurt,
My Property Values will decline,
Clouds of airborne toxic dust, including asbestos, will drift
into Grass Valley, endangering adults and children.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

*The mine will pollute our air and increase lung disease;
Trucks hauling 1,000 tons of waste rock, 100 trips every day,
down Brunswick Rd, piling it higher than a 6-story building
on the Centennial site,
Waste water will be dumped into the South Fork of Wolf Creek, destroying
habitat and stirring up existing toxic residues.*

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

JAN 31 2022

Date: 1/30/22

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,
I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE MINE WILL NOT BRING IN ENOUGH JOBS TO JUSTIFY THE COSTS. THE JOBS THAT WILL GO TO LOCALS WILL BE THE LOWEST PAYING ONES.
- I AM NOT AT ALL CONVINCED THEY HAVE A SOLID PLAN FOR WASTE DISPOSAL, CLEANUP, REMEDIATION. ONCE THEY'VE MESS'D UP THE LAND, THEY'LL GO BANKRUPT OR SOMETHING AND WE'LL GET OUT
- EUGSORE, NOISY, BRIGHT LIGHTS, WEAR! TEND ON OUR ~~ROADS~~ ROADS -- AND FOR WHAT? A FEW LOW WAGE JOBS. - FINALLY, WHAT HAPPENS WHEN THE PRICE OF GOLD DROPS? THEY MIGHT SHUT IT DOWN.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

BUILD HOMES

NOT MINES.

Date: 1/30/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

THEY DON'T HAVE A GOOD PLAN FOR CLEANUP. IT'S GOING TO BE A NOISY, POLLUTING EYESORE THAT WILL ADD WEAR AND TEAR ON ROADS! LIGHT POLLUTION. IT WILL PROVIDE FEW LOCAL JOBS, MOSTLY LOW PAYING. IF THE PRICE OF GOLD DROPS -- AND IT WILL -- IT MIGHT NOT BE FINANCIALLY FEASIBLE TO KEEP RUNNING, SO THEY'LL SOMEHOW AVOID CLEANUP! SKIP TOWN. GOLD ISN'T USEFUL. INVEST IN HOMES, AGRICULTURE, SOMETHING THAT

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

HELPS PEOPLE INSTEAD OF TRYING TO DIG MONEY OUT OF THE GROUND. IT'S CHILDISH.

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

There is SERIOUS RISK to our health, environment, our property values, and to our peace and quiet. Hard Rock mining is the single largest source of toxic waste in the US. Mining has never been a "clean business" and it never will. Waste water will destroy habitats and stir up existing toxic residue leading to disastrous effects for downstream ecosystems. Rise Gold CEO team has proven themselves to be untrustworthy. Nevada City and Grass Valley may NEVER recover fully from the harmful effects of reopening this mine!

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- 1) The number and load of trucks each day will deteriorate the local roads to the point of needed repaving each year.
- 2) The noise associated with mining will impact those residences adjacent to the mining operations.
- 3) The quality of the air will decrease due to increased emissions from mining equipment and increased truck loads.
- 4) The vast majority of the residents in this county do not want a mining operation within the sphere of influence of Grass Valley and/or Nevada City

B 326-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Date: January 28, 2022

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

water quality, noise, property value, health,

B 333-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely, Virginia Knott

FORM LETTER B 333: VIRGINIA KNOTT

Response to Comment B 333-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. Property values and quality of life concerns are outside the scope of CEQA – Please see Master Response 2. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

Regarding concerns about water quality, please see Chapter 4.8 of the DEIR and Master Response 35 – Discharge to South Fork Wolf Creek. With regard to concerns about noise pollution, please refer to Chapter 4.10, Noise and Vibration, of the DEIR.

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- 1) Deterioration to health
- 2) Crossing, blocking,
- 3) Shortened power & gas
- 4) Increased truck traffic

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Form Letter B 338

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date:

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- ~~Pumping~~ *MILLIONS OF cubic feet of ground water DANGERS RESIDENTIAL WELLS*
The mine will pollute our air and increase lung disease. Create toxic mining dust, including asbestos into our community
- Cause serious issues to our health, environment, and property values. *ESPECIALLY IN DROUGHT TIMES*
- Hard rock mining is the single largest source of toxic waste in the U.S. Trucking dangerous explosives.
- The Brunswick location is in the middle of family homes zoned residential.
- Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
- Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
- Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
- Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
- The Rise CEO has history of violations of mining and environmental laws.
- Number of possible jobs added, does not justify the potential damage noted above.
- Tourism will be hurt, based on the potential damage noted above. If citizens' wells dry up, property value is gone.
- The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
- History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Alan Dunn

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Amie Cantu

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-48-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Christopher Reilly

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Darla Draper

The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Douglas Miller

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Erin Beatie

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-129-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Gerald Gierszewski

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
James Geach

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Jim Baku

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Jon Siptrott

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Kurt Senkbeil

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Linda Fuentes

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Margaret Harcourt

The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Mike Wade

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Ricardo Fuentes

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Ron Kliewer

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
SHIRLYN A VOGEL

The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
susan a jueck

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Thomas Kitchar

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Wilton Fryer

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 200
Nevada City, CA, 95959

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Sue Hoek, Heidi Hall, Ed Scofield, Dan Miller, and Hardy Bullock:

I work own a business in Nevada County and I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corp. I expect that you will be voting on the project based on the Environmental Impact Report and community input.

I have listened to both sides of the argument and find the Rise Gold Corp. (RYES) reports and advertising to be inaccurate. They fail to adequately mitigate many significant negative impacts of this large industrial project on my community and business. It is in my business and personal interest that you do not approve this project.

My business's opposition to this project is based on RYES plans, reports and the DEIR (Draft Environmental Impact Report). Experts have reported to me that there will be significant increases in air pollution, traffic in key areas, noise from both above and below ground operations, wildfire evacuation blockages, reduction of our community's water resources, etc. They also report that any economic gains do not justify the costs to the County. Adding 312 jobs to the County workforce of approximately 44,000 is trivial no matter what the wages, and well-paying jobs will not go to County residents.

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. Huge diesel trucks and machines spewing exhaust and using key access roads to Grass Valley are not going to improve our vital image as a tourist destination.

Many tourists come here for the outdoors, art, food and wine, and live performances. Please do not permit the County's attractive environment to be damaged by air and noise pollution, a large factory, waste dumps, and industrial traffic.

Sincerely,

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. Huge diesel trucks and machines spewing exhaust and using key access roads to Grass Valley are not going to improve our vital image as a tourist destination.

Many tourists come here for the outdoors, art, food and wine, and live performances. Please do not permit the County's attractive environment to be damaged by air and noise pollution, a large factory, waste dumps, and industrial traffic.

Sincerely,

Corey Vanderwoude

NEVADA COUNTY
BOARD OF SUPERVISORS

Dear Supervisors Sue Hoek, Heidi Hall, Ed Scofield, Dan Miller, and Hardy Bullock:

I work/own a business in Nevada County and I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corp. I expect that you will be voting on the project based on the Environmental Impact Report and community input.

I have listened to both sides of the argument and find the Rise Gold Corp. (RYES) reports and advertising to be inaccurate. They fail to adequately mitigate many significant negative impacts of this large industrial project on my community and business. It is in my business and personal interest that you do not approve this project.

My business's opposition to this project is based on RYES plans, reports and the DEIR (Draft Environmental Impact Report). Experts have reported to me that there will be significant increases in air pollution, traffic in key areas, noise from both above and below ground operations, wildfire evacuation blockages, reduction of our community's water resources, etc. They also report that any economic gains do not justify the costs to the County. Adding 312 jobs to the County workforce of approximately 44,000 is trivial no matter what the wages, and well-paying jobs will not go to County residents.

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. Huge diesel trucks and machines spewing exhaust and using key access roads to Grass Valley are not going to improve our vital image as a tourist destination.

Support Card 1

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than \$90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than \$122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than \$122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than \$122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than \$122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.
